Reaching new heights

Winntec (Est. 2002) is a manufacturer, esteemed developer and international supplier of high quality, efficient and reliable automotive workshop “essentials”, available in automotive and industrial markets in Europe, North America, Southern Africa and Pacific Asia. The ranges are “priced right” and backed up by outstanding customer service and support.

Whether you are a tire shop, an automotive workshop, body shop or car dealership, Winntec offers you solutions which are certified to the highest level of useful life (professional use and not occasional use) to ensure maximum value of your investment. All our products are consistently made of the best materials available and constructed and tested in accordance with the latest and most advanced techniques.

TURBO LIFT and **AUTO SHIFT** are just two of the amazing technologies that Winntec introduced during its first decade of existence. Both systems greatly reduce the risk of injury while dealing with heavy loads in and around the shop. In the years to come we will further intensify our focus on a safe workshop environment. We plan to bring you more innovative products in which ergonomics, ease of use and price remain in perfect balance.

Heavy Duty Series

Y411350

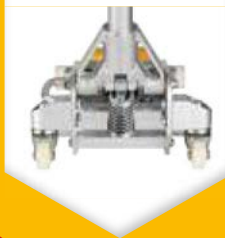

Main features

- Just 10 kg
- Nylon wheels
- PU pad

Light
as a
feather

Y411350

Winntec's popular alloy floor jack has been dominating the European market for the last 10 years. The ball bearing-mounted rear swivel caster wheels and wide track front wheels provide easy maneuverability and jack stability under load. A newly designed saddle pad (as subscribed by several European car makers) protects the vehicles bodywork and components.

Thick frame side plates and a reinforced lift arm result in added strength. A bypass and overload valve prevent from over-extension of hydraulic ram and jack use beyond rated capacity. The 2-pc. handle with quick lock offers easy storage. Heavy duty nylon wheels keep the jack's general weight below 10kg.

Specifications

A =	80 mm
B =	375 mm
C =	236 mm
D =	501 mm
E =	140 mm

Main features

- Turbo Lifter System
- PU pad
- Handle bumper

High
capacity
- 100%
alloy

Y412500

A unique 100% alloy floor jack that combines a futuristic design with our widely known and respected TURBO LIFTER (fast to the load, fast with the load) pumping technology. Its solid rubber pad ensures optimal protection while lifting the vehicle. Thick frame side plates and a multiple reinforced lift arm result in maximum strength and safety while dealing with heavy loads up to 2.5 Ton.

This low profile jack comes with heat-treated chromed pump pistons and chromed main ram. A foam handle bumper protects the car's doors while lifting in small spaces. This jack easily handles the majority of cars and light commercial vehicles during road assistance service jobs.

Specifications

A =	95 mm
B =	487 mm
C =	348 mm
D =	677 mm
E =	160 mm

ALL-
rounder

Y420220

Light weight jack with a minimum height of just 115mm. Standard version comes with rubber pad, nylon wheels and a pump handle that can easily be (dis)assembled making this jack ideal for a large variety of (mobile) service jobs. Winntec's unique TURBO LIFTER system with professional release valve guarantees a fast lift to- & with the load.

The heat-treated chromed dual pump pistons (protected with jacket to prevent from intrusion of dirt) are placed at a 45° angle so a complete pumping stroke will always be utilized. Also the main ram has a chrome plating ensuring maximum lifespan.

Pneumatic Balloon Jacks

These pneumatic jacks have a internal telescopic stabilizer (ASTM-513 steel) providing lateral and vertical stability. A safety valve prevents from overinflation.

Lightweight Winntec balloon jacks are the preferred choice of tire shops and body shops as they can be easily placed on lifts. Moreover, these jacks lift extremely fast ensuring quick wheel changes.

WHEEL ASSIST

Y472270 Wheel Assist

Best in combination with 2-post and other high rise lifts. Allows operator to install wheels at chest height. Delivered with quick install ramp, foot step and sliding rollers that ensure a safe working distance from the vehicle.

Operating as a standalone piece of workshop equipment, that doesn't require charging or linking up to a power source, the Winntec Wheel Assist has powerful gas springs that enable workshop technicians to quickly and easily remove and replace wheels while in an ergonomically correct position (chest height). This unique, patent pending product, guarantees a optimal balance between mechanical force and physical user input.

Intuitively it supports the technician, enabling them to precisely position the height of the wheel, guarding against injury during the numerous lifts required in the wheel fitting process. Designed for those heavier 25 kg plus wheels, the Winntec Wheel Assist will prove to be a essential piece of workshop equipment.

In compliance with NEN-EN 1494:2001+A1:2008

Y471147HD Smart Cart

Finally there's a product that really does the the job! This long life, light weight, high capacity cart allows the tire fitter to maneuver heavy wheel sets in the most ergonomic way with the help of its **patented tilting system**. The unique push-slide-secure automatic locking system eliminates the need for inefficient, wear sensitive, foot operated - or hand controlled jaws. The light yellow colored foam filled tires are maintenance free and leave no traces on the work shop floor. The cart has been developed in partnership with some of Europe's leading tire service chains. It comes in powdercoated steel (robotic welding) with high strength components and an exeptional 3 year warranty period. With just 20kg this lightweight cart handles most car and SUV wheelsets from 14" - 20" up to 200kg.

Y472269

Main features

- Aero alloy
- Avoiding (ceramic) brake disc damage
- Great add-on to Y472270

Perfect
centering

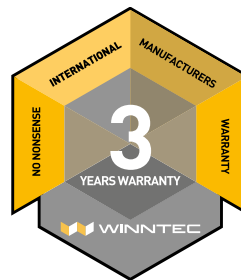

Y472269 Wheel centering bolts

These wheel centering bolts simplify the heavy wheel / wheel spacer install process by holding the rim centered on the hub as you hand screw in your lug nuts. Just screw the wheel pin in to the top bolt hole and slide your rim over the pin on to the hub. You'll get perfect rim to hub alignment every time making the job faster, easier and safer.

Particularly useful when replacing the brake discs - the centering bolt ensures that the holes in the new disc are perfectly aligned with the holes in the wheel hub.

The four most common thread and pitch sizes are included in this set (M12x1.25, M12x1.50, M14x1.25, M14x1.50).
