Light Weight Service Jacks

Y411350 (N.W. 10 kg)

Winntec's popular 100% aluminum floor jack has been dominating the European market for the last 10 years. With a 1,35T lift capacity and a 80mm minimum lift height it ensures easy access under low-profile vehicles. The ball bearing-mounted rear swivel caster wheels and wide track front wheels provide easy maneuverability and jack stability under load. A newly designed saddle pad (as subscribed by European car makers) protects the vehicles frame and components. Thick frame side plates and a reinforced lift arm result in added strength. A bypass and overload valve prevent from over-extension of hydraulic ram and jack use beyond rated capacity. The 2-pc. handle with quick lock offers easy storage. Heavy duty nylon wheels keep the jack's general weight below 10kg.

Y411350ADAP

95 mm rubber extension for Y411350

Y422510 (N.W. 34 kg)

2,5T light weight steel jack ideal for medium duty (lower amount of operating hours) applications. With a weight of just 34kg it is ideal for mobile service. The unique entrance height of 85mm ensures efficient lifting jobs when dealing with modern European vehicles. The jack comes with solid nylon wheels.
