

CAR POWER

MARATHON 1

The MARATHON 1 has an excellent tension behaviour with low-stretch. That, together with the section accuracy, means it is quiet running to a high degree when it comes to rotating alternators, water pumps or air conditioning compressors. The continuous utilization of the MARATHON 1 is of special economic efficiency due to the high maintenance-free performance.

The OPTIBELT MARATHON 1 is a special development for driving ancillaries on passenger car and commercial vehicle engines.

CHARACTERISTICS:

- Long life
- High efficiency
- Maintenance-free operation
- Quiet running
- Excellent tension behaviour

PROFILES:

AVX 10; AVX 13

SPECIAL PROFILES:

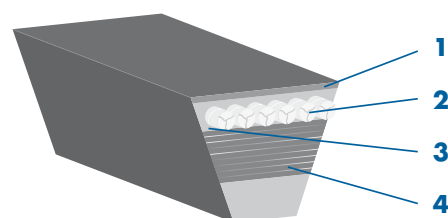

AVX 11; AVX 11,2; AVX 11,5;
AVX 11,9

DIMENSIONS:

AVX 10 from 600 to 1625 mm
AVX 13 from 700 to 2500 mm
AVX 11 528 mm
AVX 11,2 from 785 to 866 mm
AVX 11,5 from 685 to 790 mm
AVX 11,9 from 650 to 1183 mm
Further sizes on request.

APPLICATION AREAS:

For driving ancillaries on passenger car and commercial vehicle engines, multi-pulley applications, for medium performance drives

- 1 Cover fabric
- 2 Low-stretch polyester cord
- 3 Adhesive polychloroprene rubber compound (cushion strip)
- 4 Polychloroprene rubber compound with transversely oriented textile fibres
