

Product information sheet

R-Clean Lactosan

Sanitary cleaning for daily cleaning and descaling as well.

Product description

R-Clean Lactosan, based on lactic acid is for the daily maintenance of the entire sanitary room and for the removal of soap- and chalk deposits as well. It is safe on all surfaces of chromium, stainless steel, wood, glazed surfaces and tiles, except non-acid resistant stone like marble.

R-Clean Lactosan removes dirt and grease and also scale and rust. It is very mild in its use and is fully biodegradable because of the organic acids and the fast degradable surface active agents. It also gives a long lasting fresh odour in the sanitary room. Bathtubs, toilet bowls, wash basins, taps and shower cabins become clean and brilliant.

Instructions

For daily use make a solution of 5ml to 10ml/litre, f.i. in a spray bottle. For the removal of lime deposits (f.i. under the border of the toilet bowl) use R-Clean Lactosan undiluted.

Safety

Information on safety, transport, handling and storage is listed in the safety data sheet.

Chemical-technical information

- Description: Liquid, red
- pH-value: 2,3
- Density: 1,06 g/cm³

Packaging information

Pack size: 12 x 1 litre - 2 x 5 litre
Item Number: 500001203204
